European Journal of Therapeutics
OFFICIAL JOURNAL OF GAZIANTEP UNIVERSITY FACULTY OF MEDICINE

About the Journal

European Journal of Therapeutics (Eur J Ther) is an official, double-anonymous, peer-reviewed, open access journal by the Gaziantep University Faculty of Medicine.

The European Journal of Therapeutics is an international, peer-reviewed journal that addresses current developments and new treatment approaches for researchers working in basic and clinical medical sciences, dentistry, and other health sciences. The journal covers all branches of medicine and publishes original scientific articles, evaluating submissions based on their scientific significance, novelty, and relevance. The aim of the journal is to support the dissemination of high-quality research and contribute to the advancement of knowledge in the field of health sciences. The target audience includes researchers, physicians, and healthcare professionals who are interested or involved in all medical disciplines.

European Journal of Therapeutics is published online and in print. The journal publishes content in English.

European Journal of Therapeutics is an open access journal. All content is available for use and distribution without delay, with no embargo period or requirement for users to register to read content (https://eurjther.com/index.php/home/issue/archive). No charge for the print version of the journal. The European Journal of Therapeutics offers authors a completely free publishing service; no fees are charged for article submission, article processing, or final publication of their work. All submissions undergo a double-anonymous peer review by at least two independent experts to ensure scientific quality and relevance. The process follows COPE's ethical guidelines, with editorial decisions based on reviewer recommendations.

The European Journal of Therapeutics is published six issues a year (February, April, June, August, October, and December). Published content is preserved long-term using the PKP Preservation Network (PKP PN), LOCKSS, CLOCKSS, and GAÜN DSpace (Gaziantep University) to ensure permanent accessibility. Authors maintain complete ownership of all patent and other proprietary rights, including copyright, of their published articles. All articles are published under a Creative Commons Attribution-NonCommercial 4.0 International License (CC BY NC 4.0), allowing non-commercial use and distribution with proper attribution.

The journal's target audience comprises researchers, physicians, and healthcare professionals actively engaged in or deeply interested in all disciplines across the broad spectrum of medical sciences.

The European Journal of Therapeutics accepts articles of the following types for publication: original research, review articles, case reports, letters to the Editor, editorials (only Editors use), special editorial (only Editors use), reply by authors, in memory of (invited by EIC only) and book review (invited by EIC only). All submissions must significantly advance therapeutic knowledge.

European Journal of Therapeutics implements an "Early View" publication model. Under this policy, manuscripts that have completed the peer review process, received editorial acceptance, and undergone final typesetting are published online with a Digital Object Identifier (DOI) before being assigned to a specific volume and issue. For details, please refer to the Early View Publication Policy page.

All manuscripts must be submitted via the online submission system, which is available at www.eurjther.com. The journal guidelines, technical information, and the required forms are available on the journal's web page.

Statements or opinions expressed in the manuscripts published in the journal reflect the views of the author(s) and not the opinions of the Gaziantep University School of Medicine, editors, editorial board, and/or publisher; the editors, editorial board, and publisher disclaim any responsibility or liability for such materials.

OPEN ACCESS

European Journal of Therapeutics
OFFICIAL JOURNAL OF GAZIANTEP UNIVERSITY FACULTY OF MEDICINE

Instructions to Authors

European Journal of Therapeutics (Eur J Ther) is a double-anonymous, peer-reviewed, open access, international publication of the Gaziantep University School of Medicine. The journal is published six issues a year (February, April, June, August, October, and December).

European Journal of Therapeutics aims to contribute to the international literature by publishing original research, review articles, case reports, letters to the Editor, editorials (only Editors use), special editorial (only Editors use), reply by authors, in memory of (invited by EIC only) and book review (invited by EIC only) in the fields of medical sciences.

The journal's target audience comprises researchers, physicians, and healthcare professionals actively engaged in or deeply interested in all disciplines across the broad spectrum of medical sciences. For details, please refer to the Aim and Scope page.

The European Journal of Therapeutics implements an "Early View" publication model. Manuscripts that have completed the peer review process, received editorial acceptance, and undergone final typesetting are published online with a Digital Object Identifier (DOI) before being assigned to a specific volume and issue. For details, please refer to the Early View Publication Policy page.

The European Journal of Therapeutics maintains a policy of no financial barriers for authors or readers. No fees are charged to authors at any stage of the review and publication process, including submission fees, editorial processing fees, or article processing charges. All manuscripts must be submitted via the online submission system, which is available at www.eurjther.com, where authors can also find the journal guidelines, technical information, and required forms. For details, please refer to the Publication Fee Policy page.

The European Journal of Therapeutics follows the transparency and best practices for scholarly publishing, as identified by the Committee on Publication Ethics (COPE), the Directory of Open Access Journals (DOAJ), the Open Access Scholarly Publishing Association (OASPA), and the World Association of Medical Editors (WAME).

COPE, DOAJ, OASPA, WAME. Principles of Transparency and Best Practice in Scholarly Publishing. Available at: https://doi.org/10.24318/cope.2019.1.12

The European Journal of Therapeutics actively encourages authors to self-archive the final published version of their articles (preprint, accepted manuscript, published article) in institutional repositories, personal websites, or other suitable platforms, further enhancing the accessibility of their research. When sharing or redistributing their work, authors and readers are required to provide accurate citations, including the DOI link to the publisher's definitive version. For details, please refer to the Repository Policy on the Open Access page.

As the European Journal of Therapeutics, our fundamental criteria for every manuscript considered for publication are unwavering originality, superior scientific quality, and significant citation potential. It is imperative that submissions presented for evaluation have not been previously published or presented in any electronic or printed medium. Should a manuscript have been submitted to another journal for assessment and subsequently rejected for publication, it is obligatory to inform our journal; in such instances, the provision of prior reviewer reports will substantially accelerate our evaluation process.

Should the research have been previously presented at a conference or meeting, full details must be disclosed at the point of submission. The title page of the manuscript is required to include the name of the meeting, the date it was convened, and its geographical location (City, Country).
Every manuscript submitted to the European Journal of Therapeutics undergoes a meticulous double-anonymized peer-review process, designed to ensure an unbiased assessment. Within this framework, each submission is rigorously examined by at least two external and independent peer reviewers, all of whom are experts in their respective fields. Furthermore, in cases where manuscripts are submitted by our Editors or members of the Editorial Board, our Editorial Board will specifically engage an external and independent Editor to oversee and manage the evaluation procedures. For details, please refer to the Peer Review Policy page.

The Editor in Chief is the final authority in the decision-making process for all submissions.

An approval of research protocols by the Ethics Committee following international agreements (World Medical Association Declaration of Helsinki "Ethical Principles for Medical Research Involving Human Subjects," amended in October 2024, www.wma.net) is required for experimental, clinical, and drug studies and some case reports. Ethics Committee approval information, including the name of the approving institution, approval date, and approval number, must be declared on the title page and under the Materials and Methods section of the manuscript. Authors should provide the ethics committee reports.

As the European Journal of Therapeutics, we mandate that manuscripts presenting experimental studies with human participants include a definitive statement verifying that comprehensive, written informed consent was secured from all individuals, after a thorough explanation of all procedures involved. Correspondingly, for research conducted on animal subjects, a precise delineation of the measures implemented to preclude pain and mitigate suffering is an essential requirement.

All submissions are screened by similarity detection software (iThenticate by CrossCheck).
The similarity rate limit determined for our journal is 24%. For details, please refer to the Plagiarism page.

In any instance where research misconduct is alleged or suspected – including, but not limited to, plagiarism, manipulative citation practices, or the fabrication/falsification of data – our Editorial Board will meticulously adhere to and implement the comprehensive guidelines established by the Committee on Publication Ethics (COPE). For details, please refer to the Ethical Oversight page.

Each individual listed as an author should fulfill the authorship criteria recommended by the International Committee of Medical Journal Editors (ICMJE - www.icmje.org). Authorship must be based on four key criteria: substantial contributions to the conception or design of the work, or the acquisition, analysis, or interpretation of data; drafting the work

or revising it critically for important intellectual content; final approval of the version to be published; and agreement to be accountable for all aspects of the work, ensuring that questions related to its accuracy or integrity are appropriately investigated and resolved. An author must be able to identify which co-authors are responsible for specific parts of the work and should have confidence in the integrity of their co-authors' contributions. All those designated as authors should meet all four criteria for authorship, and all who meet the four criteria should be identified as authors. Those who do not meet all four criteria should be acknowledged on the title page of the manuscript. For details, please refer to the Authorship and Contribution page.

Authors are required to disclose any use of AI-assisted technologies, such as Large Language Models, chatbots, or image generators, during the article preparation process; if AI tools were employed for writing assistance, such as drafting or editing text, this must be explicitly stated in the acknowledgements section on the Title Page. For details, please refer to the Authorship and Artificial Intelligence (AI) tools page.

At the European Journal of Therapeutics, we expect each author to take responsibility for their contributions. Additionally, authors must be able to clearly outline the specific roles and responsibilities of all co-authors regarding other distinct aspects of the work. Furthermore, all contributing authors grant the designated corresponding author the authority to manage the entire publication process.

The European Journal of Therapeutics requires corresponding authors to submit a signed and scanned Copyright Agreement and Acknowledgement of Authorship Form, available for download through www.eurjther.com. Should the Editorial Board suspect a case of "gift authorship," the manuscript will be summarily rejected, without proceeding to an external peer review. When incorporating previously published content, including figures, tables, or any other material in both print and electronic formats, authors are solely responsible for obtaining explicit permission from the respective copyright holder. All legal, financial, and criminal liabilities arising from the unauthorized use of such materials belong entirely to the author (s).

By signing this form, authors agree that the article, if accepted for publication by the European Journal of Therapeutics, will be licensed under a Creative Commons Attribution-Non Commercial 4.0 International License (CC-BY-NC).

In any instance where research misconduct is alleged or suspected – including, but not limited to, plagiarism, manipulative citation practices, or the fabrication/falsification of data – our Editorial Board will meticulously adhere to and implement the comprehensive guidelines established by the Committee on Publication Ethics (COPE). For all submission types, authors must complete and submit the ICMJE Potential Conflict of Interest Disclosure Form (by all contributing authors). The Editorial Board will follow COPE and ICMJE guidelines in resolving potential conflicts of interest. For details, please refer to the Ethical Oversight page.

The Editorial Board also manages all appeal and complaint cases within the scope of COPE guidelines. Authors or readers should directly contact the editorial office regarding their appeals and complaints. In situations where internal resolution is not possible, an ombudsperson may be assigned to mediate. The Editor-in-Chief holds the final authority in the decision-making process for all appeals and complaints.

The European Journal of Therapeutics requires each submission to be accompanied by a Copyright Agreement and Acknowledgement of Authorship Form (available for download at www.eurjther.com). When using previously published content, including figures, tables, or any other material in both print and electronic formats, authors must obtain permission from the copyright holder. Legal, financial, and criminal liabilities in this regard belong to the author (s). By signing this form, authors agree that the article, if accepted for publication by the European Journal of Therapeutics, will be licensed under a Creative Commons Attribution-Non Commercial 4.0 International License (CC-BY-NC). For details, please refer to the Copyright and Licensing page.

The statements and opinions expressed in articles submitted for publication in the European Journal of Therapeutics belong solely to the authors. The statements and opinions expressed in the published content do not necessarily represent the views of the Editors, the Editorial Board, or the publisher. The ultimate responsibility for the published content rests with the authors.

WRITING RULES

The guidelines established for the preparation of articles submitted to the European Journal of Therapeutics have been prepared following the ICMJE Guidelines for Preparing Articles for Submission to Medical Journals.

Manuscripts can only be submitted through the journal's online submission and evaluation system, available at https://eurjther.com/. Manuscripts submitted via any other medium will not be evaluated.

As the European Journal of Therapeutics, we ensure that every manuscript submitted undergoes an initial, rigorous technical evaluation. Our dedicated Editorial Office staff meticulously verifies that each submission fully aligns with the journal's comprehensive guidelines. Any manuscript found not to comply with these directives will be promptly returned to the submitting author, accompanied by specific requests for technical rectification. Please be advised that the Editor reserves the absolute right to decline submissions that fail to meet these essential requirements.

Authors are expected to address any identified technical deficiencies within three business days. For necessary corrections requiring more extensive work, authors are granted a maximum of 15 days. Manuscripts that fail to meet these technical requirements or are deemed incomplete may be rejected at this stage.

The corresponding author is responsible for ensuring the accurate declaration of all authors' information and for providing all required submission details, including the complete title page and necessary forms. The corresponding author is expected to be readily available to address any requested corrections or missing information.

For all experimental, clinical, and drug studies, authors must provide an ethics committee approval report following international agreements.

European Journal of Therapeutics
OFFICIAL JOURNAL OF GAZIANTEP UNIVERSITY FACULTY OF MEDICINE

This ethics committee information must be declared in both the "Materials and Methods" section and the designated area on the title page.

Manuscripts should be submitted in Word format, using 12-point Times New Roman font, 1.5 line spacing, 2.5 cm margins, and a single line space between parentheses. While writing rules remain consistent across all article types, structural guidelines may vary. Authors can find the appropriate structuring rules for their submission type under the "Type of Papers" section.

It is mandatory for all submissions that the title page and forms are completed with comprehensive information. For any declarations that are not applicable, authors must explicitly state "not applicable" rather than leaving the field blank or deleting it.

Authors are required to submit the following:

Title Page (as a separate file)
Main text (structured by type of paper)
Main Points (consist of at least four items)
Figures (each figure must be uploaded separately)
Tables (each table must be uploaded separately)
Copyright Agreement and Acknowledgement of Authorship Form
ICMJE Potential Conflict of Interest Disclosure Form (should be filled in by all contributing authors) during the initial submission.

Templates are available for download at www.eurjther.com
These forms are available for download at www.eurjther.com

Title Page
A separate title page should be submitted with all submissions, and this page should include:
- The full title of the manuscript is no more than 15 words (avoid using abbreviations).
- Name, address, telephone (including the mobile phone number), and e-mail address of the corresponding author,
- Name(s), affiliations, highest academic degree(s) and contact information of the author(s),
- Add the 16-digit ORCID of the author (s)
- Grant information and detailed information on the other sources of support,
- Conflict of Interest Statement: Potential conflicts of interest must be declared.
- In studies involving human participants, a declaration of informed consent must be made.
- A data-sharing declaration must be made, specifying which data can be shared and when it will be available. A link to the repositories where the study sets to be shared will be accessible must be provided.
- The name of the ethics committee and the date of approval must be stated in the manuscript.
- Authors must be identified according to their contributions.

Individuals who contributed to the preparation of the article but do not meet the authorship criteria should be acknowledged in the acknowledgements section.

Please refer to the link below for access to our structured sample templates.
https://eurjther.com/index.php/home/manuscript_template

Main Text
Place the title, abstract, and keywords on the first page of the main text.

Organize the manuscript into four main headings: Introduction, Materials and Methods, Results, and Discussion.

Limitations, drawbacks, and shortcomings of original articles should be mentioned in the Discussion section before the conclusion paragraph. Then place the references and figure legends in the main text, respectively.

All references, tables, and figures should be referred to within the main text, and they should be numbered consecutively in the order they are referred to within the main text.

Define abbreviations at first mention in the text and each table and figure.

If a brand name is cited, supply the manufacturer's name and address (city and state/country).

DO NOT EMBED IMAGES or TABLES in the mail text.

Please refer to the link below for access to our structured sample templates.
https://eurjther.com/index.php/home/manuscript_template

Main Points
The content of the "Main Points" title should consist of an average of four items (as a separate file in Word format).

Text Formatting
Manuscripts should be submitted in Word.
Use a normal, plain font (e.g., 12-point Times Roman, 1.5 line spacing, and justified) for text.
Do not use field functions.
Use the automatic page numbering function to number the pages.
Do not indent at the beginning of a line.
Save the file in docx format (Word 2013 or higher).

Tables
All tables are to be numbered using Arabic numerals.
Tables should always be cited in text in consecutive numerical order.
Each table must be uploaded as separate files (e.g., table 1, table 2, and table 3).

Figures
Figures must be saved at a resolution of at least 600 dpi.
Figures, graphics, and photographs should be submitted as separate files (in TIFF or JPEG format) through the submission system (e.g., figure 1, figure 2, and figure 3).
The files should not be embedded in a Word document or the main document.

Figures should not be embedded in the manuscript text file.
Figure legends should be listed at the end of the main document.
All acronyms and abbreviations used in the manuscript should be defined at first use, both in the abstract and in the main text.
The abbreviation should be provided in parentheses following the definition.

Authors are responsible for the accuracy of references.

EndNote style of the Eur J Ther

References
In reference, the names of all authors should be written. The usage of "et al." should not be preferred.

Reference citations in the text should be numbered in square brackets.
Some examples:
Parent et al. [3] reported that .....
..... on medical radiation [21,22].
..... sleep quality among adolescents [15,18-21,22,25-30].
..... anxiety, depression, and a decrease in proprioception [5,16-18].

If available, please always include DOIs as full DOI links in the reference list.
(e.g. "https://doi.org/.....").
* Use the Crossref Text Query tool to match DOIs of references.

Use abbreviations for journal names. Journal titles should be abbreviated following the journal abbreviations in Index Medicus/ MEDLINE/ PubMed.

Numbers, Statistics, and Units
Manuscripts should follow the conventions of the AMA Manual of Style for numbers, statistics, and units of measurement.

Numbers: Use numerals for numbers 10 and above, and for numbers below 10 when preceding a unit of measurement (e.g., 3 mg, 5 mm, 2 years). Spell out numbers one through nine when used without a unit. Do not begin a sentence with a numeral; restructure the sentence if necessary.

Use a comma as the thousands separator and a period as the decimal separator (e.g., 12,636 patients; mean age 10.6 years).

Dates should be written in full within the text (e.g., October 6, 2023). For date ranges, use an en dash without spaces (e.g., October 2023–March 2024).

Statistics: Include a space on each side of mathematical operators: mean ± SD, $p < 0.05$, $r = 0.87$. The symbol p should be italicized and lowercase. Report confidence intervals using an en dash (–): 95% CI: 1.23–4.56. Always include a zero before a decimal point less than 1: 0.05, not .05.

Units: Standard units and symbols should adhere to the rules of the International System of Units (SI). Please provide converted values in SI units in parentheses. Place a space between the numeral and the unit symbol (e.g., 10 mg, 5 mL), except for the degree symbol (e.g., 37°C). Write unit symbols correctly (e.g., for millimeter "mm" in lowercase, for kilogram "kg" in lowercase). Do not put periods after symbols (e.g., "kg" not "kg."). Do not use plurals (e.g., "5 kg" not "5 kgs").

Dates: In the manuscript text, write dates in full using the month name (e.g., October 6, 2023). For date ranges, use an en dash (–): October 2023–March 2024. In tables and figures, numeric date formats using a forward slash are acceptable to save space (e.g., 10/6/2023).

Abbreviations and Symbols
Abbreviations should be avoided in the title. Clarity and consistency must be maintained within the main text. When first used, abbreviations should be presented with their full form in parentheses, and thereafter, only the abbreviation should be used. In lengthy texts, an acronym may be reintroduced with its full form in parentheses at its first use within each new section.

Supplementary Materials
Supplementary materials, which complement the main text of the article, including datasets and additional documents (e.g., appendices, supplementary figures, tables), should be uploaded as separate files and presented as a distinct section after the reference list. Each supplementary material must include brief descriptions to explain its relevance to the article. Page numbering is not required for supplementary materials.

Use of Products
When referencing any specific drug, product, hardware, or software program within the manuscript, always include the product's full name, the manufacturer, and their city and country in parentheses immediately after the first mention of the item.

Author-Suggested Reviewers
Authors are required to propose at least five reviewers when submitting their manuscripts.
It should be noted that there should be no conflict of interest between these

European Journal of Therapeutics
OFFICIAL JOURNAL OF GAZIANTEP UNIVERSITY FACULTY OF MEDICINE

proposed reviewers and the authors, and that these recommendations should comply with international ethical standards.

Recommended reviewers should have competence in the subject of the article.

The proposed reviewers must not have collaborated with the authors of the article in the last three years and must not be working in the same institution.

Revisions
When submitting a revised version of a paper, the author must submit a detailed "Response to the reviewers" that states point by point how each issue raised by the reviewers has been covered and where it can be found (each reviewer's comment, followed by the author's reply and line numbers where the changes have been made) as well as an annotated copy of the main document.

Revisions should be marked on the main text file with a yellow background. The deadline for submitting revised manuscripts is set at seven calendar days following the dispatch of the decision letter. If the revised version of the manuscript is not submitted within the allocated time, the revision option may be canceled.

Accepted manuscripts are copy-edited for grammar, punctuation, and format. Once the publication process of a manuscript is completed, it is published online on the journal's webpage as an ahead-of-print publication before it is included in its scheduled issue. A PDF proof of the accepted manuscript is sent to the corresponding author, and their publication approval is requested within 2 days of their receipt of the proof.

Withdrawn
Articles accepted for publication and published in early view may be withdrawn in the following cases:
- If incorrect data is found in the content of the article or in cases where the authors declare that the information, such as copyright infringement, plagiarism, ethics committee reports, etc., is misleading or incorrect.

The Editor will decide to remove the retracted article from publication in conjunction with the Editorial Board. The Editors reserve the right to publish the article, depending on the degree of error in its content.

The withdrawn article will be linked to the published version, along with an explanation for its withdrawal.

Retraction
Published articles may be retracted if;
- In cases where the content of the article is found to be unreliable due to incorrect data, data manipulation as a result of incorrect calculation, unethical reports, etc.,
- In cases where it is complained/detected that information such as copyright infringement, plagiarism, ethics committee reports, etc., is misleading/incorrect in the authors' statements,
- Where findings are found to have been used without appropriate citation of previously published references, without justification, and without disclosure to the Editors.

Retractions will be published as quickly as possible to minimize harmful effects.

The COPE guideline will be followed in resolving issues.

To request a retraction, please use the online request system or write a letter of explanation to the Editor at the contact address provided on the web page of the journal.

The Editor and Editorial Board will review the request and decide whether to publish a retraction.

The corresponding author submitting the request should provide a signed letter of application from all contributing authors.

The request for retraction includes a link to the retracted article and identifies the sender and the reasons for the retraction.

Correction
Where errors found in a published article do not alter the direction or significance of the article's conclusions, inferences, or interpretations, a correction will be published. The corrected text will be published promptly on a separate page, including clear information such as the full content of the corrected text/data and the date of correction. A link to the corrected article will be provided. The corrected version of the article will be published in both HTML and PDF formats. Citations should refer to the most recent version.

For details, please refer to the Corrections and Retractions page.
